7. AT&T LOCAL EXCHANGE SERVICES

7.1. AT&T LOCAL EXCHANGE SERVICES (continued)

7.1.15. AT&T Local Exchange Services - DS-1 Digital Facilities Service

AT&T Local Exchange Services-DS-1 Digital Facilities is a digital service providing dedicated connections from an end user's digital Private Branch Exchange (PBX), key system, or hybrid device to the AT&T Local Service Switch Port.

The Customer may opt to utilize AT&T Local Exchange Services-DS-1 Digital Facilities for outgoing calls only (DOD), incoming calls terminated directly to an end user behind a PBX or capable key system (DID), a combination of both incoming calls to an attendant and outgoing calls (Two-way Combo), or a combination of both incoming calls directly to an end user and outgoing calls (DID/DOD). When DID or DID/DOD service is ordered, direct inward dialing (DID) numbers must be purchased from the Company. AT&T Local Exchange Services-DS-1 Digital Facilities is available where facilities and operating systems exist. AT&T Local Exchange Services-DS-1 Digital Facilities includes Touch-Tone.

DS-1 Digital Facilities may be provisioned as a standalone service or provisioned over a Dedicated Entrance Facility (DEF) (T)
or Ultraviable Ring (UVN). Rates and charges are listed in the (T)
Price List.

Customers utilizing AT&T Local Exchange Services-DS-1 Digital Facilities must subscribe to a sufficient number of DS1 facilities to handle adequately the volume of traffic offered (received or originated) without interfering with any of the services offered by the Company. The number of DS-1 facilities required to handle adequately such traffic will be determined by Company measurements. In the event that an inadequate number of DS-1 facilities cause interference, the Company shall have the right to discontinue service without prior notification to the Customer.

AT&T Local Exchange Services-DS-1 Digital Facilities is offered in conjunction with an associated long distance service offering provided by AT&T: AT&T Business Network or OneNet Option.

At the Company's discretion, the Company may reconfigure the Customer's service to another service provided by AT&T and any of its affiliates authorized to provide you with AT&T Service prior to November 17, 2005, if the Customer's usage meets one or more of the following criteria: (1) equals or exceeds 90% utilization for inbound calling on trunks configured for Inbound and Outbound calling functionality, (2) equals or exceeds an average call duration of 10 minutes per call for inbound calling, (3) equals or exceeds CCS (one hundred call seconds or one hundred seconds of telephone conversation) loading of 32 CCS, or (4) equals or exceeds 300,000 minutes of use for inbound calling per DS-1 facility.
