2.7.5 Minimum Protection Criteria (continued)

B. All Connections

Customer equipment, test equipment and Customer-provided communications systems which are connected to the network on a direct electrical basis or an acoustic or inductive basis, must comply with the following:

1. To protect other Company services, it is necessary that the signal which is applied at the station meets the following limits:

a. Metallic Voltage

- (1) 4 KHz to 270 KHz

Center Frequency (f) of 8 KHz Band	Max. Voltage in All 8 KHz Bands	Terminating Impedance
8 KHz to 12 KHz	- (6.4 + 12.6 log f) dBV ¹	300 ohms
12 KHz to 90 KHz	(23 - 40 log f) dBV	135 ohms
90 KHz to 266 KHz	- 55 dBV	135 ohms

- (2) The root-mean-square (RMS) value of the metallic voltage components in the frequency range of 270 KHz to 6 MHz shall, averaged over 2 microseconds, not exceed -15 dBV. This limitation applies with a metallic termination having an impedance of 135 ohms.

b. Longitudinal Voltage

- (1) 4 KHz to 270 KHz

Center Frequency (f) of 8 KHz Band	Max. Voltage in All 8 KHz Bands	Longitudinal Terminating Impedance
8 KHz to 12 KHz	- (18.4 + 20 log f) dBV ¹	500 ohms
12 KHz to 42 KHz	(3 - 40 log f) dBV	90 ohms
42 KHz to 266 KHz	- 62 dBV	90 ohms

- (2) The root-mean-square (RMS) value of the longitudinal voltage components in the frequency range of 270 KHz to 6 MHz shall, averaged over 2 microseconds, not exceed -30 dBV. This limitation applies with a longitudinal termination having an impedance of 90 ohms.

B. All Connections (continued)

2. To prevent the interruption or disconnection of a call, it is necessary that the signal power applied at the station be limited. Specifically, the signal at the station shall at no time have energy concentrated solely in the 2450 to 2750 Hz band. If there is signal power at the station in the 2450 to 2750 Hz band, it must not exceed the power present at the same time in the 800 to 2450 Hz band.

C. Direct Electrical Connections

In addition to the regulations in B. preceding, Customer equipment, test equipment and Customer-provided communications systems which are connected to the network on a direct electrical basis must comply with the following:

To prevent excessive noise and crosstalk, it is necessary that the power of the signal presented at the AT&T Central Office not exceed 12dB below one milliwatt when measured over any three second interval. To insure that this limit is not exceeded, the power of the signal which may be applied by the Customer equipment, test equipment or Customer-provided communications system to the station will be specified for each Customer location. In no case shall the power exceed one milliwatt.

D. Acoustic or Inductive Connections

In addition to the regulations in B. preceding, Customer equipment and Customer-provided communications systems which are connected to the network on an acoustic or inductive basis must comply with the following:

To prevent excessive noise and crosstalk, it is necessary that the power of the signal which is applied by the equipment to the station located on the Customer's or user's premises be limited so that the signal power does not exceed 9dB below one milliwatt when averaged over any three second interval. However, to permit each Customer, independent of distance from the serving office, to supply signal power which at the serving office, approximates 12dB below one milliwatt when averaged over any three-second interval, the Company, at the Customer's request, will specify, for each Customer location, the signal power at the station, which shall in no case exceed one milliwatt.

Connections to a Casual Calling/Initial Subscription Service will be made in accordance with the following:

A. Answer Supervision

Answer supervision must be provided when a Casual Calling/Initial Subscription Service offering is connected to a switching equipment or a Customer-provided communications system which is not subject to Part 68 of the F.C.C.'s Rules and Regulations, 47 C.F.R. Part 68. In such cases, the equipment or system must provide answer supervision so that the measure of chargeable time begins upon the delivery of the Casual Calling/Initial Subscription Service call to the switching equipment or to the equipment connected to the communications system and ends upon termination of the call by the calling party.

B. Minimum Protection Criteria

The connection at the station used for the Casual Calling/Initial Subscription Services must be made so that it continually complies with the specified Minimum Protection Criteria in this Tariff following.

C. Customer-Provided Communications System Failures

When a Customer-provided communications system fails and the connection to a Casual Calling/Initial Subscription Service is not through switching equipment, the Customer-provided communications system must be arranged to promptly return the Casual Calling/Initial Subscription Service to an idle (on-hook) state. In addition, the Customer must notify the Company when the Customer-provided communications system fails.

D. Use of Satellite Facilities

If a Customer-provided communications system uses satellite facilities (directly or indirectly) and is connected to a Casual Calling/Initial Subscription Service, there may be two or more satellite links involved in the combined connection. In such cases, the Company will not be responsible for any deterioration in transmission. It will continue to furnish the Casual Calling/Initial Subscription Services using the service components that it considers to be appropriate.

2. GENERAL REGULATIONS

2.8 PRICE DETERMINATION

The price for a Casual Calling/Initial Subscription Services call is determined by factors such as:

- The distance between the rate centers of the originating (calling) station and the terminating (called) station; and, under certain conditions the distance between the V&H coordinates of an AT&T central office and the rate center of a station of the V&H coordinate of an AT&T central office;
- The time-of-day and the day-of-week; and
- The duration of the call.

The specific factors which apply to a given Casual Calling/Initial Subscription Services call and their application are listed in the Price List section applicable to that type of call. The regulations pertaining to those factors are as follows:

2.8.1 Time-of-Day and Day-of-Week

The price charged for a Casual Calling/Initial Subscription Services call may be determined in part by the day-of-week and the time-of-day at the originating (calling) station or at the AT&T central office associated with the originating (calling) station using special access. Different prices may be applicable to a call at different times of the day and on certain days of the week as specified in the appropriate price section for that call.

2.8 PRICE DETERMINATION (continued)

2.8.2 Determining the Chargeable Time of a Call

The chargeable time for a Casual Calling/Initial Subscription Services call is determined by the duration of the call. Chargeable time includes the initial period plus the additional time involved, if any, and is determined as follows:

- A. On all calls, chargeable time begins when completed connection is established between the calling station and the called station.
- B. Chargeable time ends when the calling station hangs up. If the called station hangs up, but the calling station does not, chargeable time ends when the connection is released either by automatic timing equipment in the telecommunications network or by the Company operator.
- C. Initial minute rates for all calls are one minute or any fraction thereof.
- D. All additional minute rates are for each additional minute or any fraction thereof that the connection continues beyond the initial minute.
- E. When Casual Calling/Initial Subscription Services are directly connected to a Customer-provided communications system at a Customer's or user's premises, chargeable time begins when a Casual Calling/Initial Subscription Services call terminates in, or passes through, the first Customer equipment on that Customer-provided communications system. It is the Customer's responsibility to furnish appropriate answer supervision to the point of interface with the Casual Calling/Initial Subscription Services so that chargeable time may begin.
