NOTICE TO PUBLIC SERVICE ELECTRIC AND GAS COMPANY CUSTOMERS

IN THE MATTER OF THE PETITION OF PUBLIC SERVICE ELECTRIC AND GAS COMPANY FOR APPROVAL OF ITS CLEAN ENERGY FUTURE - ENERGY EFFICIENCY ("CEF-EE") PROGRAM ON A REGULATED BASIS

Notice of Public Hearings
BPU Docket Nos. G018101112 and E018101113

TAKE NOTICE that Public Service Electric and Gas Company ("Public Service," "PSE&G," or "Company") filed a petition with the New Jersey Board of Public Utilities ("Board" or "BPU") in October 2018 requesting approval to expand its energy efficiency deployment in its service territory beyond current levels through the establishment of a Clean Energy Future - Energy Efficiency Program ("CEF-EE Program" or "Program").

Additionally, the Company has requested the authority to implement an electric and gas Green Enabling Mechanism (GEM), which would decouple PSE&G's electric and gas sales revenue from per customer usage.

The CEF-EE Program includes 22 subprograms that aim to increase energy efficiency in all sectors of the economy and offer savings opportunities across PSE&G's customer base. The subprograms will implement energy efficiency measures that will be in effect for as much as 30 years.

PSE&G seeks BPU approval to commit up to \$2.5 billion in direct investment and \$283 million in expense over a period of approximately six (6) years. Approval of this filing would increase rates to be paid by the Company's electric customers by \$33.0 million and increase rates to be paid by the Company's gas customers by \$1.4 million.

PSE&G proposes to recover all Program costs through a new, separate component of the existing electric and gas Green Programs Recovery Charge ("GPRC") entitled "Clean Energy Future - Energy Efficiency Program." The CEF-EE Program component will be applicable to all electric and gas rate schedules. The component would be reviewed and modified in an annual filing.

The Company is requesting that any over/under recovery of actual revenue requirements compared to revenues be deferred. In calculating the monthly interest on net over and under recoveries, the interest rate would be based upon the Company's interest rate obtained on its commercial paper and/or bank credit lines utilized in the preceding month. The revenue requirement is calculated using the Company's most recent authorized weighted average cost of capital, which is currently set at 6.95%. The proposed GPRC rates, if approved by the Board, are shown in Table #1. Rate recovery of the CEF-EE costs will commence in 2019 and continue through 2042.

Table #2 and #3 provide the approximate net effect of the proposed initial increase in rates relating to the CEF-EE Program, if approved by the Board. The annual percentage increase applicable to specific customers will vary according to the applicable rate schedule and the level of the customer's usage. The approximate effect of the proposed initial increase on typical electric and gas residential monthly bills, if approved by the Board, is illustrated in Table #4 and #5.

Under the Company's proposal, a typical residential electric customer using 740 kWh per summer month and 6,920 kWh on an annual basis would see an initial increase in the annual bill from \$1,253.76 to \$1,257.64, or \$3.88, or approximately 0.31%. In addition, PSE&G proposed to recover the overall Program costs over a period of approximately 25 years, with total recoveries of an estimated \$2,798 million, and a peak increase to typical annual residential electric bills of \$40.68 occurring in 2030. The average annual rate impact through 2043 would amount to an average increase in the annual bill of \$20.46, or 1.6% during this period.

Under the Company's proposal, a residential gas heating customer using 100 therms per month during the winter months and 610 therms on an annual basis would see an initial increase in the annual bill from \$566.34 to \$568.64, or \$0.30, or approximately 0.05%.

Moreover, under the Company's proposal, a typical residential gas heating customer using 172 therms per month during the winter months and 1,040 therms on an annual basis would see an initial increase in the annual bill from \$893.03 to \$893.43, or \$0.40, or approximately 0.04%. In addition, PSE&G proposed to recover the overall Program costs over a period of approximately 25 years, with total recoveries of an estimated \$694 million and a peak increase to typical annual residential gas bills of \$20.32 occurring in 2032. The average annual rate impact through 2043 would amount to an average increase in the annual bill of \$10.82, or 1.2% during this period.

The Board has the statutory authority pursuant to N.J.S.A. 48:2-21 to establish the GPRC to levels it finds just and reasonable. Therefore, the Board may establish the GPRC at a level other than that proposed by Public Service. Therefore, the described charges may increase or decrease based upon the Board's decision.

Copies of the Company's filing are available for review at the Company's Customer Service Centers (addresses located here: <https://nj.pseg.com/customerservice/locations>), online at the PSEG website at <http://www.pseg.com/pseandgfilings>, and at the Board of Public Utilities at 44 South Clinton Avenue, 2nd Floor, Trenton, NJ 08625-0350. Any member of the public who wants to inspect the petition at the Board may contact the Board's Division of Case Management at (609) 292-0806 to schedule an appointment.

The following dates, times and locations for public hearings on the Company's CEF-EE Program filing have been scheduled so that members of the public may present their views. Information provided at the public hearings will become part of the record of this case and will be considered by the Board in making its decision.
