Docket Nos. E003050394, ER17040335, ER18040356, ER19040428

Compliance Tariff Filing Reflecting Changes to Schedule 12 Charges in PJM Open Access Transmission Tariff Docket No.

Dear Secretary Camacho-Welch:

Enclosed for filing on behalf of Jersey Central Power & Light Company ("JCP&L"), Atlantic City Electric Company ("ACE"), Public Service Electric and Gas Company ("PSE&G"), and Rockland Electric Company ("RECO") (collectively, the "EDCs"), please find an original and ten copies of tariff sheets and supporting exhibits that reflect proposed changes to the PJM Open Access Transmission Tariff ("OATT") made in response to the formula rate filing made by JCP&L in Federal Energy Regulatory Commission ("FERC") Docket No. ER20-227-000.

eterson, Energy

LEGAL\43947247\2

### **Background**

In its Orders dated October 22, 2003 (BPU Docket No. EO03050394) and October 22, 2004 (BPU Docket No. EO04040288), the New Jersey Board of Public Utilities ("Board" or "BPU") authorized the EDCs to recover FERC-approved changes in firm transmission service-related charges. The Board has also authorized recovery of FERC-approved changes in firm transmission service-related charges in subsequent orders approving the Basic Generation Service ("BGS") supply procurement process and the associated Supplier Master Agreement ("SMA"). In subsequent Board Orders, the BPU approved Section 15.9 of the SMAs, which authorizes the EDCs to increase or decrease the rates paid to BGS suppliers for FERC-approved rates and changes to Firm Transmission Service once approved by the Board.

On October 30, 2019, JCP&L made a filing with FERC under Section 205 of the Federal Power Act requesting approval of a formula rate revenue requirement used to establish the Network Integration Transmission Service ("NITS") rate charged for the JCP&L zone and the Transmission Enhancement Charge ("TEC") revenue requirements under the PJM Open Access Transmission Tariff ("PJM OATT"). The proposed formula rate will be an increase compared to JCP&L's current stated transmission rate. JCP&L requested a rate effective date of January 1, 2020 and anticipates a FERC order ruling on JCP&L's filing prior to December 31, 2019.

The EDCs are making this filing pursuant to the BGS Supplier Master Agreement ("SMA"), Section 15.9, which provides in pertinent part:

### 15.9 Changes in Transmission Charges for Firm Transmission Service

- (a) If during the term of this Agreement, a filing is made with the FERC to increase or decrease the charges for Firm Transmission Service, including any charge or surcharge imposed on customers receiving Firm Transmission Service, or if the charges for Firm Transmission Service are adjusted pursuant to a FERC-authorized formula rate, then the following procedures shall apply:
- (i) within forty-five (45) days of the date upon which the rate change filing or formula rate informational filing is made with the FERC, the Company will notify the BGS-RSCP Suppliers that such rate filing has been made, and will seek approval from the Board to increase or decrease the charges to BGS-RSCP Customers by the amount of such rate adjustment for Firm Transmission Service;

The EDCs' pro-forma tariff sheets, included as Attachment 2a (JCP&L), Attachment 3 (PSE&G), Attachment 4 (ACE) and Attachment 5 (RECO), propose effective dates of January 1, 2020, and specifically reflect changes to BGS rates applicable to Basic Generation Service – Residential Small Commercial Pricing ("BGS-RSCP"), and Commercial and Industrial Energy ("BGS-CIEP") customers resulting from the JCP&L formula rate case filed with FERC on October 30, 2019. The specific additional PJM transmission charges related to the JCP&L filling will be found in Schedule 12 of the PJM OATT. Once FERC issues an order approving the implementation of JCP&L's proposed formula transmission rate, PJM will update its Schedule 12 Transmission Enhancement Worksheet, which, along with Schedule 12 and Attachment H-4 of

the PJM OATT, will incorporate the formula rate updates referenced herein. Because, upon FERC approval, BGS suppliers will begin paying these increased transmission charges in January 2020, the EDCs request a waiver of the 30-day filing requirement.

The Schedule 12 charges, also defined as TECs in the PJM OATT, were implemented to compensate transmission owners for the annual transmission revenue requirements for "Required Transmission Enhancements" (again, as defined in the PJM OATT) that are requested by PJM for reliability or economic purposes. TECs are recovered by PJM through an additional transmission charge in the transmission zones assigned cost responsibility for Required Transmission Enhancement projects.

#### Request for Board Approval

The EDCs respectfully request approval to implement these revised tariff rates effective January 1, 2020. In support of this request, the EDCs have included pro-forma tariff sheets as noted above. The BGS rates have been modified in accordance with the Board-approved methodology contained in each EDC's Company-Specific Addendum in the above-referenced BGS proceedings and in conformance with each EDC's Board-approved BGS tariff sheets.

The determinants for calculation of the PJM charges will be set forth in Schedule 12 of the PJM OATT and on the Formula Rates page of the PJM website. Copies of JCP&L's formula rate schedules are attached, but, upon FERC approval, will also be found on the PJM website at: http://www.pjm.com/markets-and-operations/billing-settlements-and-credit/formula-rates.aspx. Attachment 1 shows the derivation of the JCP&L Network Integration Transmission Service Charge. Attachments 2(a) and 2(b) show the JCP&Ls pro-forma tariff sheets and the translation of JCP&L's NITS charge into retail customer rates. The translation of the transmission zone rate impact to the BGS rates of each of the other EDCs, assuming implementation on January 1, 2020, is included as Attachments 3, 4, and 5 for PSE&G, ACE, and RECO, respectively. Attachment 6 shows the cost impact of the JCP&L Schedule 12 Project Charges for the January through December 2020 period for each of the EDCs. Attachment 7 provides excerpts of the Schedule 12 OATT indicating the responsible share of each such Project. Attachment 8 provides details regarding the formula rate filling for JCP&L.

The EDCs also request that BGS Suppliers be compensated for the changes to the OATT resulting from the implementation of the JCP&L project annual formula updates effective on January 1, 2020. Suppliers will be compensated subject to the terms and conditions of the applicable SMAs. Any differences between payments to BGS-RSCP and BGS-CIEP Suppliers and charges to customers will flow through BGS Reconciliation Charges.

This filing satisfies the requirements of ¶¶ 15.9 (a)(i) and (ii) of the BGS-RSCP and BGS-CIEP SMAs, which mandate that BGS-RSCP and BGS-CIEP Suppliers be notified of rate increases for firm transmission service, and that the EDCs file for and obtain Board approval of an increase in retail rates commensurate with the FERC-implemented rate increase.

We thank the Board for all courtesies extended.

Respectfully submitted,

COZEN O'CONNOR

# Service Classification RS Residential Service

APPLICABLE TO USE OF SERVICE FOR: Service Classification RS is available for: (a) Individual Residential Structures; (b) separately metered residences in Multiple Residential Structures; (c) incidental use for non-residential purposes when included along with the residence; and/or (d) Auxiliary Residential Purposes whether metered separately from the residence or not.

This Service Classification is optional for customers which elect to be billed hereunder rather than under Service Classification RT. (Also see Part II, Section 2.03)

**CHARACTER OF SERVICE:** Single-phase service, with limited applications of three-phase service, at secondary voltages.

RATE PER BILLING MONTH (All charges include Sales and Use Tax as provided in Rider SUT): All charges are applicable to Full Service Customers. All charges, excluding Basic Generation Service (default service), are applicable to Delivery Service Customers.

#### BASIC GENERATION SERVICE (default service):

- BGS Energy and Reconciliation Charges as provided in Rider BGS-RSCP (Basic Generation Service – Residential Small Commercial Pricing) (formerly Rider BGS-FP)
- 2) Transmission Charge: \$0.008758 per KWH for all KWH including Water Heating

DELIVERY SERVICE (Customer and Distribution charges include Corporation Business Tax as provided in Rider CBT):

- Customer Charge: \$2.78 per month
   Supplemental Customer Charge: \$1.45 per month Off-Peak/Controlled Water Heating
- 2) Distribution Charge:

June through September:

**\$0.015108** per KWH for the first 600 KWH (except Water Heating) **\$0.059743** per KWH for all KWH over 600 KWH (except Water Heating)

October through May:

\$0.024749 per KWH for all KWH (except Water Heating)

Water Heating Service:

**\$0.016517** per KWH for all KWH for Off-Peak Water Heating **\$0.021756** per KWH for all KWH for Controlled Water Heating

Issued: Effective:

Filed pursuant to Order of Board of Public Utilities Docket No. dated

XX Rev. Sheet No. 6 Superseding XX Rev. Sheet No. 6

# Service Classification RT Residential Time-of-Day Service

**APPLICABLE TO USE OF SERVICE FOR:** Service Classification RT is available for: (a) Individual Residential Structures; (b) separately metered residences in Multiple Residential Structures; (c) incidental use for non-residential purposes when included along with the residence; and/or (d) Auxiliary Residential Purposes whether metered separately from the residence or not.

This Service Classification is optional for customers which elect to be billed hereunder rather than under Service Classification RS. (Also see Part II, Section 2.03)

**CHARACTER OF SERVICE:** Single-phase service, with limited applications of three-phase service, at secondary voltages.

RATE PER BILLING MONTH (All charges include Sales and Use Tax as provided in Rider SUT):
All charges are applicable to Full Service Customers. All charges, excluding Basic Generation Service (default service), are applicable to Delivery Service Customers.

#### BASIC GENERATION SERVICE (default service):

- BGS Energy and Reconciliation Charges as provided in Rider BGS-RSCP (Basic Generation Service – Residential Small Commercial Pricing) (formerly Rider BGS-FP)
- 2) Transmission Charge: \$0.008758 per KWH for all KWH on-peak and off-peak

DELIVERY SERVICE (Customer and Distribution charges include Corporation Business Tax as provided in Rider CBT):

- Customer Charge: \$5.19 per month
   Solar Water Heating Credit: \$1.30 per month
- 2) Distribution Charge:

\$0.046298 per KWH for all KWH on-peak for June through September \$0.034008 per KWH for all KWH on-peak for October through May \$0.021627 per KWH for all KWH off-peak

 Non-utility Generation Charge (Rider NGC): (See Rider NGC for any applicable St. Lawrence Hydroelectric Power credit)

\$0.000492 per KWH for all KWH on-peak and off-peak

- 4) Societal Benefits Charge (Rider SBC): \$0.007013 per KWH for all KWH on-peak and off-peak

# Service Classification RGT Residential Geothermal & Heat Pump Service

APPLICABLE TO USE OF SERVICE FOR: Service Classification RGT is available for residential customers residing in individual residential structures, or in separately metered residences in multiple-unit residential structures, who have one of the following types of electric space heating systems as the primary source of heat for such structure or unit and which system meets the corresponding energy efficiency criterion:

Geothermal Systems with Energy Efficiency Ratio (EER) of 13.0 or greater;

Heat Pump Systems with Seasonal Energy Efficiency Ratio (SEER) of 11.0 or greater, and a Heating Season Performance Factor (HSPF) which meets the then current Federal HSPF standards;

Room Unit Heat Pump Systems with Energy Efficiency Ratio (EER) of 9.5 or greater.

Service Classification RGT is not available for customers residing in individual residential structures, or in separately metered residences in multiple-unit residential structures, which have an electric resistance heating system as the primary source of space heating for such structure or unit.

CHARACTER OF SERVICE: Single-phase service, with limited applications of three-phase service, at secondary voltages.

RATE PER BILLING MONTH (All charges include Sales and Use Tax as provided in Rider SUT):
All charges are applicable to Full Service Customers. All charges, excluding Basic Generation Service (default service), are applicable to Delivery Service Customers.

#### BASIC GENERATION SERVICE (default service):

- BGS Energy and Reconciliation Charges as provided in Rider BGS-RSCP (Basic Generation Service – Residential Small Commercial Pricing) (formerly Rider BGS-FP)
- 2) Transmission Charge:

\$0.008758 per KWH for all KWH on-peak and off-peak for June through September \$0.008758 per KWH for all KWH for October through May

DELIVERY SERVICE (Customer and Distribution charges include Corporation Business Tax as provided in Rider CBT):

- Customer Charge: \$5.19 per month
- 2) Distribution Charge:

June through September:

\$0.046298 per KWH for all KWH on-peak \$0.021627 per KWH for all KWH off-peak

October through May:

\$0.024749 per KWH for all KWH

# Service Classification GS General Service Secondary

**APPLICABLE TO USE OF SERVICE FOR:** Service Classification GS is available for general service purposes at secondary voltages not included under Service Classifications RS, RT, RGT or GST.

CHARACTER OF SERVICE: Single or three-phase service at secondary voltages.

RATE PER BILLING MONTH (All charges include Sales and Use Tax as provided in Rider SUT):
All charges are applicable to Full Service Customers. All charges, excluding Basic Generation Service (default service), are applicable to Delivery Service Customers.

#### BASIC GENERATION SERVICE (default service):

- 1) BGS Energy and Reconciliation Charges as provided in Rider BGS-RSCP (Basic Generation Service Residential Small Commercial Pricing) (formerly BGS-FP) or Rider BGS-CIEP (Basic Generation Service Commercial Industrial Energy Pricing)
- Transmission Charge:
  \$0.008758 per KWH for all KWH including Water Heating

DELIVERY SERVICE (Customer and Distribution charges include Corporation Business Tax as provided in Rider CBT):

1) Customer Charge:

\$ 3.10 per month single-phase

\$11.13 per month three-phase

**Supplemental Customer Charge:** 

\$ 1.45 per month Off-Peak/Controlled Water Heating

\$ 2.54 per month Day/Night Service\$11.57 per month Traffic Signal Service

2) Distribution Charge:

KW Charge: (Demand Charge)

\$ 6.63 per maximum KW during June through September, in excess of 10 KW

\$ 6.17 per maximum KW during October through May, in excess of 10 KW

\$ 3.01 per KW Minimum Charge, in excess of 10 KW

# Service Classification OL Outdoor Lighting Service

**RESTRICTION:** Mercury vapor (MV) area lighting is no longer available for replacement and shall be removed from service when existing MV area lighting fails.

**APPLICABLE TO USE OF SERVICE FOR:** Service Classification OL is available for outdoor flood and area lighting service operating on a standard illumination schedule of 4200 hours per year, and installed on existing wood distribution poles where secondary facilities exist. This Service is not available for the lighting of public streets and highways. This Service is also not available where, in the Company's judgment, it may be objectionable to others, or where, having been installed, it is objectionable to others.

CHARACTER OF SERVICE: Sodium vapor (SV) flood lighting, high pressure sodium (HPS) and mercury vapor (MV) area lighting for limited period (dusk to dawn) at nominal 120 volts.

RATE PER BILLING MONTH (All charges include Sales and Use Tax as provided in Rider SUT):

#### (A) FIXTURE CHARGE:

Nominal Ratings

Lamp	Lamp & Ballast	<b>Billing Month</b>	HPS	MV	SV
Wattage	Wattage	KWH *	Area Lighting	Area Lighting	Flood Lighting

The above Basic Generation Service Energy Charges reflect costs for Energy, Generation Capacity, Transmission, and Ancillary Services (including PJM Interconnection, L.L.C. (PJM) Administrative Charges). The portion of these charges related to Network Integration Transmission Service, including the PJM Seams Elimination Cost Assignment Charges, the PJM Reliability Must Run Charge and PJM Transmission Enhancement Charges may be changed from time to time on the effective date of such change to the PJM rate for these charges as approved by the Federal Energy Regulatory Commission (FERC).

Kilowatt threshold noted above is based upon the customer's Peak Load Share of the overall summer peak load assigned to Public Service by the Pennsylvania-New Jersey-Maryland Office of the Interconnection (PJM). See Section 9.1, Measurement of Electric Service, of the Standard Terms and Conditions of this Tariff.

#### **CIEP Standby Fee**

\$0.000160 per kWh

This charge recovers the costs associated with the winning BGS-CIEP bidders maintaining the availability of the hourly priced default electric supply service plus administrative charges pursuant to N.J.S.A. 48:2-60 and New Jersey Sales and Use Tax as set forth in Rider SUT. This charge is assessed on all kWhs delivered to all CIEP- eligible customers on Rate Schedules MGS Secondary, MGS Primary, AGS Secondary, AGS Primary or TGS.

#### **Transmission Enhancement Charge**

This charge reflects Transmission Enhancement Charges ("TECs"), implemented to compensate transmission owners for the annual transmission revenue requirements for "Required Transmission Enhancements" (as defined in Schedule 12 of the PJM OATT) that are requested by PJM for reliability or economic purposes and approved by the Federal Energy Regulatory Commission (FERC). The TEC charge (in \$ per kWh by Rate Schedule), including administrative charges pursuant to N.J.S.A. 48:2-60 and New Jersey Sales and Use Tax as set forth in Rider SUT, is delineated in the following table.

## SERVICE CLASSIFICATION NO. 7 LARGE GENERAL TIME-OF-DAY SERVICE (Continued)

#### **SPECIAL PROVISIONS**

#### (A) Space Heating

Customers who take service under this classification for 10 kW or more of permanently installed space heating equipment may elect to have the electricity for this service billed separately. All monthly use shall be billed at a Distribution Charge of 2.902 ¢ per kWh during the billing months of October through May and 4.693 ¢ per kWh during the summer billing months, a Transmission Charge of 0.404 ¢ per kWh and a Transmission Surcharge of 0.430 ¢ per kWh during all billing months. The applicability of Transmission Charges and the Transmission Surcharge is described in Part (3) of RATE – MONTHLY.

When this option is requested it shall apply for at least 12 months and shall be subject to a minimum charge of \$26.87 per year per kW of space heating capacity. This provision applies for both heating and cooling where the two services are combined by the manufacturer in a single self-contained unit.

All usage under this Special Provision shall also be subject to Parts (4), (5), and (6) of RATE – MONTHLY. This Special Provision is not available to those customers taking high voltage distribution service.

This special provision is closed to new customers effective August 1, 2014.

#### (B) Budget Billing Plan

Any condominium association or cooperative housing corporation who takes service hereunder and any other customer taking service under Special Provision B of this Service Classification may, upon request, be billed monthly in accordance with the budget billing plan provided for in General Information Section 8 of this tariff.

Formula Rate - Non-Levelized

Jersey Central Power & Light

General Note: References to pages in this formulary role are indicated as: (page#, line#, col.#)

References to data from FERC Form I are indicated as: #.y.x (page, line, column)

- Letter As provided by PIM and in effect at the time of the annual rate calculations pursuant to Section 34.1 of the PIM OATT.
- Prepayments shall exclude prepayments of income taxes.
- Transmission-related only
- Includes the status income tax cost or benefits due to permanent differences or differences between the smounts of expenses or revenues recognized in one period for reternating purposes and the amounts recognized for income tax purposes which do not reverse in one or more other periods, including the cost of income taxes on the Allowance for Other Funds Used During Construction
- Upon ensetment of changes in this law, income tax rates (including changes in expectionment) and other actions taken by a taxing authority, deferred taxes are re-measured and adjusted in the Company's books of account, resulting in excess or deficient accommutated deferred taxes. Such excess or deficient amount was measured and respect to the excess or deficient amount was measured and respect to the excess or deficient amount was measured and recorded for financial
- Accuminates certified arx. Such assets of the second secon
- O Identified in Form 1 as being only transmission related.
- Commission Frontal accinent to solving the guaranteem review.

  Cash Working Capital accinence to transmission is one-cipith of O&M allocated to transmission at page 3, line 14, column 5 minus amortization of regulatory assets spage 3, line 11, col. 5). Prepayments are the electric related prepayments booked to Account No. 153 and reported on Page 111, time 5 in the Form 1.

  Line 7 EPRI Annual Membership Dues listed in Form 1 at 353.£ all Regulatory Commission Expenses directly related at 751 h, and non-safety related advertising included in Account 930.1. Line 8 Regulatory Commission Expenses directly related to transmission service, 1800 filings, or transmission siding literalized at 351 h.
- Includes only FICA, uncomployment, highway, property, gross receipts, and other assessments charged in the current year. Taxes related to income are excluded. Gross receipts taxes are not included in transmission revenue requirement in the Rate Formula Template, since they are accourted elsewhere.
- Templies, Ribbe they are recovered easewarder.

  The currently effective income tax rale, where FT is the Federal income tax rate; SIT is the State income tax rate, and p = "the percentage of federal income tax deductible for state income taxes". If the utility is taxed in more than one state it must attach a work paper aboveing the name of each rate and how the blended or composite SIT was developed. Furthermore, a utility that effected to utilize a meetization of tax credits against taxable income, rather than book tax credits to Account No. 255 and reduce rate base, must reduce its income tax expense by the amount of the Amortized Investment Tax Credit (Form 1, 266.8.f) multiplied by (1/1-T) (page 3, line 30).

- FIT = 21.00%
  SIT 9.00% (Slate Income Tax Rate or Composite SIT)
  pr
  (percent of federal intome lax deductible for slate purposes)

  Removes dollar amount of transmission expenses included in the OATT ancillary services rates, including Account Nos. 56.1.3 sad 561.BA., and related to generation step-up facilities, which are deemed included in OATT ancillary services. For these purposes, generation plant determined by Commission order to be rate-involutional accounts.
- M Removes transmission plant determined by Commission order to be state-jurisdictional according to the seven-factor test (until Form 1 balances are adjusted to reflect application of seven-factor test).
- Removes dollar amount of transmission plant included in the development of OATT ancillary services rates and generation step-up facilities, which are decemed included in OATT ancillary services. For these purposes, generation step-up facilities are those facilities at a generator substation on which there is no through-flow when the generator is shut down.
- Enter dollar amounts
- Debt coat rate was Assaurated 10, Column (j) total. Preferred coat rate = preferred dividends (line 21) / preferred outstanding (line 23). ROB will be supported in the original filing and no change in ROB may be made absent a filing with FERC.
- Q Line 28 must equal zero since all short-term power sales must be unbundled and the transmission component reflected in Account No. 456.1 and all other uses are to be included in the divisor
- Includes income related only to transmission facilities, such as pole attachments, rentals and special use. Excludes revenues unrelated to transmission services.
- The revenues credited on page 1, lines 2-6 shall include only the amounts received directly (in the case of grandfathered agreements) or from the ISO (for service under this tariff) reflecting the Transmission Owner's integrated transmission facilities. They do no include creenues associated with FERC annual charges, gross receipts taxes, ancillary services, or facilities not included in this template (e.g., direct assignment facilities and GSUs) which are not recovered under this Rate Formula Template. The revenue on
- Plant in Service, Accumulated Degreciation, and Degreciation Expense amounts exclude Asset Retirement Obligation amounts unless authorized by FERC.

  On Page 4, Line 31, enter exvenues from RTO actilements that are associated with NTS and firm Point-to-Point Service for which the load is not included in the divisor to derive JCP&L's zonal rates. Exclude non-firm Point-to-Point revenues and revenues related to NTEP projects.
- Account No. 501.4. 561.8, and 575.7 consist of RTO expenses billed to load-serving entities and are not included in Transmission Owner revenue requirements. Calculate using a 13 month average balance.
  Calculate using average of beginning and end of year balance.
  Includes only CWIP authorized by the Commission for inclusion in rate base.

- Instituted using Certif entironties up on Commission, therefore, him will remain zero until a projectic) is granted an ROE incentive adder.

  Unamortized Abandoned Plant and Amortization of Abandoned Plant will be zero until the Commission accepts or approves recovery of the cost of abandoned plant. Utility must submit a Section 205 filing to recover the cost of abandoned plant.
- CC Peak as would be reported on page 401, column d of Form 1 at the time of the zonal peak for the twelve month period ending October 31 of the calendar year used to calculate rates. The projection year will utilize the most recent preceding 12-month period at the time of the filing.

#### Notes

Line 17 to include an incentive ROE that is used only to determine the increase in return and incomes taxes associated with a specific increase in ROE. Any actual ROE incentive must be approved by the Commission. Until an ROE incentive is approved, line 17 will reflect the current ROE.

Period II

Statement BK
Attachment H-4A, Attachment 3
page 1 of 1
For the 12 months ended 12/31/2020

#### **Gross Plant Calculation**

JCP&L Company Records

### Notes

3 Amortized Deficient Deferred Taxes

[A] AFUDC equity component is the gross cumulative annual amount based upon tax records of capitalized AFUDC equity embedded in the gross plant attributable to the transmission function.

(B) (C)

- [B] Upon enactment of changes in tax law, income tax rates (including changes in apportionment) and other actions taken by a taxing authority, deferred taxes are remeasured and adjusted in the Company's books of account, resulting in excess or deficient accumulated deferred taxes. Such excess or deficient deferred taxes attributed to the transmission function will be based upon tax records and calculated in the calendar year in which the excess or deficient amount was measured and recorded for financial reporting purposes. The balance located within Column 3, row 2 and row 3, is the net impact of excess deferred and deficient amortization.
- [C] Year end balance for line 1 taken to Attachment H-4A, page 3, line 32; Year end balance for lines 2-3 taken to Attachment H-4A, page 3, line 33
