Subject: [EXTERNAL] Altice/ Service Electric acquisition - Docket No. CM20030211
Date: Monday, June 29, 2020 7:02:07 PM

Hello

I am writing you good folks about the upcoming Altice/ Service Electric acquisition. The area here in Warren County NJ is currently served by Centrylink and Service Electric. There is a digital data drought here as this current combination has inadequate capability installed here to support the current and future needs. A recent Centurylink expansion was put in place but has not been sufficient to meet the needs. Service Electric was expected to also expand their current holdings in the area to make up the difference, but this has not yet come about. As we now learn, Altice is planning on purchasing Service Electric. This would be the time to get the data service expansion plans for the Knowlton/Warren County formalized and contingent with this acquisition.

Hope this note finds everyone well.

Regards
